PROFESSIONAL SUMMARY

Software Developer with hands-on full-stack experience and a Computer Science background specialising in cybersecurity. Brings strong engineering fundamentals system design, API architecture, debugging, performance tuning combined with genuine curiosity and a disciplined approach to learning. Comfortable integrating AI tooling into daily workflows while preserving engineering rigour and code quality. Bilingual in French and English; experienced working on collaborative, remote-first engineering teams.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TailwindCSS, HTML5, CSS3

Back-End: Node.js, Express.js, DjangoREST, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL

Languages: JavaScript, TypeScript, Python, Java, C, SQL

Tools & DevOps: Git, Docker, K8's, Microsoft Azure, Postman

Languages: French (native), English (professional)

PROFESSIONAL EXPERIENCE

Cybears Jul 2025 – Sept 2025

Web Developer Intern

- Co-designed and co-developed a cybersecurity awareness platform from the ground up, taking ownership of both frontend and backend delivery.
- Engineered the frontend with Next.js & TailwindCSS, optimising Largest Contentful Paint (LCP) and accessibility - achieving a 20% increase in user engagement.
- Built and deployed backend services with Django REST, PostgreSQL and Docker, contributing to API design, database modelling and production deployment.
- Applied disciplined debugging and code-review practices throughout, maintaining quality standards alongside fast iteration.

Startup Project Mar 2025 – Jul 2025

Full-Stack Developer - Restona (Restaurant Management Platform)

- Architected and built a multi-role restaurant management platform unifying waiter, chef, customer, and delivery workflows into a single digital system.
- Designed and implemented REST APIs with Express.js & PostgreSQL, covering cart logic, real-time notifications, and role-based access control.
- Drove system design sessions, performance profiling, and deployment strategy to ensure the platform scaled reliably.
- Optimised the Next.js & TailwindCSS frontend for load performance and accessibility across device types.

Microsoft Jan 2024 – Present

Microsoft Learn Student Ambassador

- Collaborated on technical projects, including an AI-powered plant disease recognition system.
- Organized workshops and hackathons, helping students learn cloud computing, AI, and modern software engineering practices.
- Continuously developed skills in Azure, AI, and software engineering through Microsoft Learn and hands-on experimentation.

Multidisciplinary Project Mar 2024 – May 2024
Co-Developer - Euvora (Event Management Platform)

- Co-designed and co-developed a full-stack event management application enabling organizers to create, share, and manage events at scale.
- Led frontend development with React.js & TailwindCSS, improving accessibility and driving a 20% uplift in user engagement.
- Integrated backend functionality using Express.js and MongoDB, collaborating on API design and data flow architecture.

EDUCATION, CERTIFICATIONS & ACTIVITIES

Education

M.Eng. Computer Science (in progress)
Final year Student at the Higher National School of
Computer Science, Sidi Bel Abbes (ESI-SBA)

Certifications

Fundamentals of Deep Learning - Nvidia DLI
Back-End Development - Jonas Schmedtmann
Offensive Hacking - ComproAvi

Extracurricular Activities

Technical Team - Shellmates Club
Higher National School of CS, Algiers (ESI ex INI)

Learning Community Co-Lead - Ingeniums Club
Higher National School of CS, Sidi Bel Abbes
(ESI-SBA)
